# INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/US2004/029442

	Box No. I Basis of the rep	ort				
1.	With regard to the language, this report is based on the international application in the language in wh filed, unless otherwise indicated under this item.					
	This report is based on tr which is the language of	ranslations from the original language into the following language, a translation furnished for the purposes of:				
	publication of the interpretation	under Rules 12.3 and 23.1(b)) rnational application (under Rule 12.4) rry examination (under Rules 55.2 and/or 55.3)				
2.	have been turnished to the re	of the international application, this report is based on (replacement sheets which receiving Office in response to an invitation under Article 14 are referred to in this are not annexed to this report):				
	Description, Pages					
	1-10	as originally filed				
	Claims, Numbers					
	1-11	as originally filed				
	Drawings, Sheets					
	1/4-4/4	as originally filed				
	☐ a sequence listing and/or	any related table(s) - see Supplemental Box Relating to Sequence Listing				
3.		esulted in the cancellation of:				
	<ul><li>☐ the description, pages</li><li>☐ the claims, Nos.</li></ul>					
	☐ the drawings, sheets/fi☐ the sequence listing (s					
		sequence listing (specify):				
4.	had not been made, since the Supplemental Box (Rule 70.2)	· ''				
	<ul><li>the description, pages</li><li>the claims, Nos.</li></ul>					
	☐ the drawings, sheets/fi☐ the sequence listing (s					
		sequence listing (specify):				
	* If item 4 applies,	some or all of these sheets may be marked "superseded "				

International application No. PCT/US2004/029442

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Yes: Claims

3,4,8,9,11

No: Claims

1,2,5-7,10

Inventive step (IS)

Yes: Claims No: Claims

none 1-11

Industrial applicability (IA)

Yes: Claims

1-11

No: Claims

none

2. Citations and explanations (Rule 70.7):

see separate sheet

#### Re Item V.

1 Reference is made to the following documents:

D1: WO 00/70117 A (THE REGENTS OF THE UNIVERSITY OF CALIFORNIA) 23 November 2000 (2000-11-23)

D2: EP 0 617 142 A (SHIN-ETSU CHEMICAL CO., LTD) 28 September 1994 (1994-09-28)

### 2 INDEPENDENT CLAIM 1

- 2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT. Document D1 discloses (page 15 lines 10 13, and page 29 line 10 page 31 line 9) a method for deposition of a silicate film on a substrate by creating a glow discharge between two electrodes and flowing a helium and oxygen gas mixture containing 2002 ppm by weight tetraethylorthosilicate (TEOS) through the plasma and towards the substrate. The speed of the gas mixture is at least 1 metre per second. The amount of TEOS in the gas mixture was calculated using the density values of 0.1785 g/l and 1.429 g/l for helium and oxygen respectively.
- 2.2 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

  Document D2 discloses (page 3 line 5 43) a method for deposition of a silicate film on a substrate by creating a glow discharge between two electrodes and flowing argon containing up to 10000 ppm by volume tetraethylorthosilicate (TEOS) through the plasma and towards the substrate. The speed of the gas mixture is 0.26 m/s based on a gas flow of 300 sccm and the 5 mm diameter of the plasma flame.

### 3 DEPENDENT CLAIMS 2-11

Dependent claims 2-11 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Article 33(2) and (3) PCT).
